

SHIVAM KHAJURIA

Computer Science Engineering Student • Full Stack Web Developer

[Phone Number] • [Email Address] • [GitHub] • [LinkedIn] • [LeetCode] • [Portfolio Website]

PROFESSIONAL SUMMARY

Computer Science Engineering student with a strong foundation in Data Structures and Algorithms, demonstrated through 230+ solved LeetCode problems in C++. Passionate about Full Stack Web Development and currently building expertise in the MERN stack through hands-on projects. Focused on building real-world, user-centric applications and continuously expanding knowledge of modern web technologies.

TECHNICAL SKILLS

Programming Languages	C++, JavaScript, HTML5, CSS3
Frontend	React, HTML, CSS, JavaScript
Backend	Node.js, Express.js
Database	MongoDB
Tools & Technologies	Git, GitHub, VS Code

PROJECTS

EchoScribe | AI-Powered Accessibility Application

GitHub: [GitHub Link] | Live Demo: [Live Demo Link]

- Engineered an AI-assisted speech-to-text pipeline that converts spoken input into clean, readable text for users with speech impairments.
- Implemented intelligent text cleanup logic to refine transcription output and improve real-world readability and accuracy.
- Built a responsive, accessibility-first React interface designed to ensure ease of use across devices and assistive technologies.
- Delivered a smoother, more inclusive communication experience for people with speech-related disabilities.

Tech Stack: React • Node.js • MongoDB

Study Assistant | AI-Powered PDF Learning Platform

GitHub: [GitHub Link] | Live Demo: [Live Demo Link]

- Developed a platform enabling students to upload PDF documents and interact with content through AI-driven conversation.
- Built automated flashcard and quiz generation features to strengthen active recall and self-assessment for learners.
- Designed smart notes generation to condense lengthy material into concise, structured study summaries.
- Created an end-to-end learning workflow spanning document upload, comprehension, and revision.

Tech Stack: React • Node.js • MongoDB

Spotify Clone | Responsive Music Streaming Interface

GitHub: [GitHub Link] | Live Demo: [Live Demo Link]

- Built a Spotify-inspired frontend to strengthen core React fundamentals and responsive UI development skills.
- Structured the application using component-based architecture for maintainability and reusability.
- Designed a functional playlist interface and music player UI with attention to visual and interaction detail.
- Delivered a clean, polished frontend implementation optimized across screen sizes.

Tech Stack: HTML • CSS • JavaScript • React

CERTIFICATIONS

IBM AI Developer Professional Certificate	IBM
Software Developer Career Guide and Interview Preparation	IBM

ACHIEVEMENTS

- Solved 230+ LeetCode problems using C++, reflecting consistent practice in problem solving and algorithmic thinking.
- Built multiple frontend and full-stack web applications spanning AI-powered tools and consumer-facing interfaces.
- Continuously learning modern web technologies and backend development to stay current with industry practices.
- Developed a strong foundation in Data Structures and Algorithms through sustained, focused practice.

STRENGTHS

Problem Solving • Analytical Thinking • Full Stack Development • Clean Code Practices • Quick Learner • Team Collaboration • Strong Debugging Skills • Adaptability
